

To Whom It May Concern,

The Purpose of my comment is to make express how happy My family & friends are to have KLOVE Station in our community. This radio station helps out to keep a positive attitude during the day.

It is always played in our cars.

I dont see ourselves listening other radio stations. Our friends and family are tired to listen the same news, the same love songs and some programs are not appropriate for children or for elderly people.

But by listening Klove in our house,car, and everywhere we go (even when we travel to other cities in California), we know that we will ALWAYS get positive encouraging music, listen other people comments about how they have changed their lives to a much better way of living. Now, those people who are listening God's message through a song/testimony are a colaborating with their community. This was the way I started doing voluntering work for my community.

We will really appreciate if our station KLOVE in Santa Clara, CA stays with us in our community,

Sincerely,

ZG
